Aims and Scope

The *Journal of Southeast Asian Earth Sciences* is an international interdisciplinary journal devoted to all aspects of research related to the Earth Sciences in Southeast Asia. Papers featured will include the results of research on regional geology, economic geology, geochemistry, petroleum geology, petrology, palaeontology, geophysics (seismology, magnetics, electrical and gravity), structure, tectonics, geomorphology, engineering geology, Quaternary geology and analysis of sedimentary basins.

While the *Journal* will be primarily devoted to research papers, short communications relating to new developments of broad interest, book reviews and technical reports of meetings will also be included.

It is the primary purpose of this journal to publish the research of both local and foreign geoscientists in one easily accessible publication.

Manuscripts (three copies) and correspondence should be addressed to the Editor-in-Chief, Deputy Editor-in-Chief or any of the Editors. (See instructions for contributors on the inside back cover for full details.)

The geographical area covered by the journal is taken to include Burma, Thailand, Malaysia, Vietnam, Kampuchea, Laos, Southern China, Hong Kong, Singapore, Indonesia, Papua New Guinea and The Philippines. Papers covering Japan and Korea will be considered also, but the subject matter should be of regional interest and related to other parts of this region (e.g. tin and tungsten in Korea, petroleum basins off Japan, heat flow studies, etc.). The Indian sub-continent is a separate geological unit and only certain aspects of Indian geology which have some bearing on Burma, Thailand, Malaysia and Indonesia can be considered for publication.
